VST VIBRATING SORTER TABLE

Overview

The Armbruster VST is an all stainless steel vibrating sorting table designed for manual cluster sorting of grapes for improving fruit quality and cleanliness. The stainless steel construction makes this table highly sanitary, easy to clean, reliable and long lasting. With available options like an integrated crusher and second dejuicing zone you can outfit the table to your preferred winemaking style.

Key Features

- Manual cluster sorting for improved fruit quality
- Easy to clean and maintain due to its simplistic design
- Gentle vibration energy feeds grapes at a controlled rate
- Slotted dejuicing zones with screen to separate out MOG
- Robust stainless frame with four casters for easy mobility
